

Danish government extends support to Esofflow

On 28 February 2010, the Danish Embassy in Hanoi announced that it is extending the ongoing project phase via the Danish Government's B2B Programme in Vietnam. For the extension, Esofflow will receive an additional grant of DKK 853,000 over the next 12 months in order to continue strengthening the HR capacity and working environment.

Esofflow has been part of the B2B Programme since the company establishment in 2007, and is often used as an example of best practice when it comes to promoting the working environment as well as corporate social responsibility activities. CSR is an integrated part of the Esofflow's strategy including concrete goals for employment of disabled and female staff.
