

## Esoftflow employs staff no. 100

June 1st 2010, Esoftflow reached another milestone as the company employed staff number 100. The number is remarkable as in less than three years, the company has gone from just 10 staff to now 100. Esoftflow is planning further expansion in the coming year as the company continues to take in an increasing volume of images from a growing number of clients.

In July, the company plans to recruit more staff to prepare for an expected increase in production during the autumn period. Staff are trained by an assigned team which takes them through both technical aspects of the job as well as various soft skills. The initial training takes from 6-10 weeks depending on the skill level and work tasks.
