

## Vietnamese national TV follows Esoffflow employee

Ms. Nguyen Thao Van joined Esoffflow shortly after its establishment back in 2007, and has over the years become somewhat of a celebrity both inside and outside the company. Ms. Van comes from Nghe An province in central Vietnam. She was born with severe birth defects caused by the chemical dioxin used during the war. Despite her disabilities, Ms. Van has persevered in life. Aside from working as a Photo Editor with Esoffflow, Ms Van also is active in teaching IT and soft skills to other disabled people so that they as well stand a chance to be integrated into the labour market and hence support themselves.

The story of Ms. Van has received a lot of media attention from both foreign and local media. In July 2010, Vietnam's leading television station (VTV3) followed the daily life of Ms. Van, and in August 2010 a short film was aired on Vietnamese national television. The film can now be viewed at Youtube via the following link:
