

EMBASSY STOPS BY AGAIN

On October 25th, the Danish Ambassador to Vietnam, John Nielsen stopped by Esoftflow together with Deputy, Lis Rosenholm. Both were introduced to Esoftflow's set up and business model.

The visit was also to discuss details surrounding the Crown Prince's visit in November, as well as the general corporation between Esoftflow and the Danish Embassy in Hanoi.

We like to be famous – maybe not in the whole world yet, then at least in Vietnam.....

E-COMMERCE IS ON ITS WAY

In October we had kick-off on our future e-commerce platform. When launched, we expect the platform to further boost our level of service towards our clients. The introduction of the platform is set for April 2012.

In the process of developing the platform we wish to work closely with our clients and partners to make sure that the solution is as user-friendly as possible.

Let's do business !!

ROYAL VISITOR

On November 29, Esoftflow will have the honor of welcoming Crown Prince Frederik of Denmark to our office. The Crown Prince visits Vietnam in connection with the 40 year anniversary of establishment of diplomatic relations between Denmark and Vietnam.

Esoftflow is among only a few companies to be visited by the Crown Prince on his trip.

Needless to say we are excited about this !!

KEEPING TRACK

In October our production department took initiative to further boost focus on our performance. Each production team upgraded their performance board enabling all staff to keep track of performance. The boards are updated on a daily basis and also include various team activities.

All teams took the challenge head on. The floor plan team won the price for best design and structure. Congratulation !!
